#### **DETAILED ACTION**

## Claim Rejections - 35 USC § 112

- 1. The following is a quotation of the second paragraph of 35 U.S.C. 112:
  - The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter, which the applicant regards as his invention.
- 2. Claims 20-21 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

### Claim 20:

• Line 2, "the aperture" lacks clear antecedent basis.

Claim 21 is dependent from claim 20 above and is therefore indefinite.

Appropriate correction is required.

#### Double Patenting

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970);and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Application/Control Number: 10/714,436

Art Unit: 2861

4. Claims 1-44 are rejected under the judicially created doctrine of double patenting over claims 1, 8, 22, 30-32, 34, 43, 57, 62 of U. S. Patent No. **6,791,592** since the claims, if allowed, would improperly extend the "right to exclude" already granted in the patent.

Page 3

The subject matter claimed in the instant application is fully disclosed in the patent and is covered by the patent since the patent and the application are claiming common subject matter, as follows: The recited limitations in the above-mentioned U. S. Patent No. 6,791,592 includes every limitation set forth in the above-mentioned claims of the current application with a slight difference in the wording, namely:

- providing a printing system having a laser source for producing a printing beam;
- moving the product within a printing range of the printing beam;
- continuously directing the printing beam to a plurality of locations on the product material without de-activating the printing beam;
- adjusting a dwell time of the printing beam as the printing beam is continuously directed to the plurality of locations to form a plurality of spots on the product material, the dwell time at each formed spot being longer than a dwell time on areas of the product material traveled by the printing beam between consecutive spots, the dwell time at each formed spot being sufficient to alter an optical characteristic of the product material;
- forming the plurality of spots to form a pixel on the product material;

Application/Control Number: 10/714,436

Art Unit: 2861

in response to a variable velocity of the product moving past the printing system,
 adjusting [at least one of a size of each pixel,] a density of pixels for each
 symbol, [and the dwell time of the printing beam at each spot];

Page 4

- receiving a first data set indicating positions of pixels in the sequence of symbols;
- generating a corrected data set indicating positions of pixels to be formed on the material according [to a variable velocity of the product moving with respect to the laser source];
- and forming the sequence of symbols according to the corrected data set;
- prioritizing an order in which the pixels are formed according to a shape of an aperture on the laser source, the pixels being formed in a direction, which is opposite to a direction which the product moves with respect to the laser source;
- the locations are selected such that the spots form one or more pixels on the material;
- the laser is mounted in a housing coupled with a printing beam exit member, [the
   printing beam exit member being manually movable relative to the housing];
- the spots arranged so as to define the pixels on the material.

Furthermore, there is no apparent reason why applicant was prevented from presenting claims corresponding to those of the instant application during prosecution of the application, which matured into a patent. See *In re Schneller*, 397 F.2d 350, 158 USPQ 210 (CCPA 1968). See also MPEP § 804.

Application/Control Number: 10/714,436 Page 5

Art Unit: 2861

## Response to Arguments

5. Applicant's arguments with respect to claims 1-44 have been considered but are moot in view of the new grounds of rejection presented in this Office action.

#### **Contact Information**

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Hai C Pham whose telephone number is (571) 272-2260. The examiner can normally be reached on M-F 8:30AM - 5:30PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David L Talbott can be reached on (571) 272-1934. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
